

**Product:**  
**Plastic Pipe Cutters**

- The T850026 has a unique “V” shaped blade which allows for off-centre motion which reduces tube deformation. The “V” shaped blade also gives greater cutting pressure with less effort making it easier to use. The slicing motion of this specially hardened steel blade means that it is sharpened every time a cut is made. It is used on 26mm plastic pipes
- The THPC166 can be used on plastic tubes up to 67mm and additionally provides telescopic arm for easy adjustment.

**Application: T850026**

- able to cut many materials including, Hep20 or equivalent, Blue water main, Overflow, Plastic electrical conduit, Supertube or equivalent, Mini-trunking, Rubber hose, Pneumatic pipe and electrical sleeving

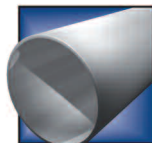

T850026

**Application: THPC166**

- for cutting plastic tubes up to 67mm only.
- With special 19mm cutting wheel (in the handle knob), suitable for copper, brass, aluminium, and thinwalled steel tubes

THPC166
